How to play

- **Setup.** Two players, two pen colors. The ball starts on the center dot.
- **Move.** On your turn, draw one line from the ball to a neighboring dot — straight or diagonal, one square long.
- **No reuse.** A line can never be drawn twice, and you can't travel along the border.
- **Bounce.** If your line ends on a dot that already has a line through it — or on the border — you immediately move again. Chain bounces to sprint across the pitch.
- **Score.** Put the ball into your opponent's goal to win. An own goal counts for your opponent.
- **Stuck?** No legal move on your turn means you lose.

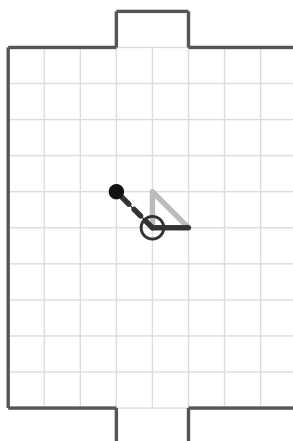

From a real game

Kick-off

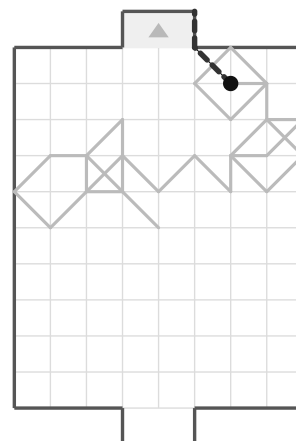

The first six moves of a real game: the ball leaves the centre dot and players alternate — Player 1 dark, Player 2 light.

The bounce

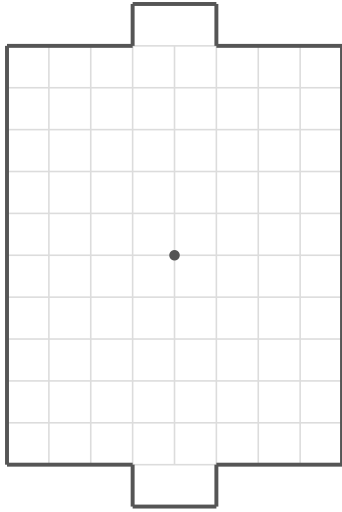

The solid move lands on a dot that already carries a line (circled) — so the same player immediately moves again (dashed).

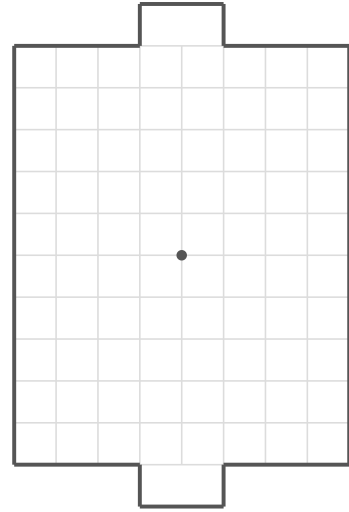

Scoring

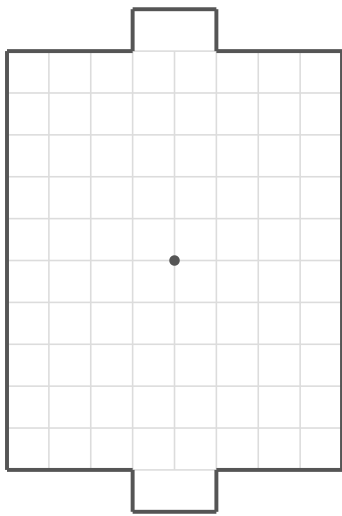

A winning chain (dashed): bounce off used dots and put the ball into the shaded goal. First goal wins.
